M E S S A G E

IGDC Project in Tripura has been launched with the laudable objective of poverty alleviation and enhancement of livelihood opportunities through optimal natural resource management and convergence of efforts in some of the most underdeveloped areas of the State. The website of the project shall make widely available different facets and facts of the project. It shall provide a very useful means of viewing the progression of the project in course of time.

I wish an improved physical and socio-economic environment on successful implementation of the project.

29/12

(S. Talukdar)

Principal Chief Conservator of Forests
Tripura
