

INDO-GERMAN DEVELOPMENT COOPERATION PROJECT

Improving well being

“We the women from Ramnagar, Dhalajhari, Twichakma and JB Para ADC Village under Dumburnagar RD Block have participated in the candle making training organised under IGDC Project. During the course of training, besides the making of regular day to day useable candles, we have learnt making of various types of fancy candles which was not known to us before the training programme. The training was very fruitful for us, as we have learnt many new things. Before this training, we were investing money for purchasing candle for our personal use with high price. Nowadays, we have undertaken candle making as a serious business, during the spare time out of daily house-chores activities. Though, the relatively small scale production of candles at present is primarily either consumed among ourselves for domestic usage or for local sales within the village, we are thinking to promote our products at outside markets in larger scale aimed at. Thanks to IGDC Project for showing us a more prosperous way of life.”
